

SEVEN®

MOBILE
EMAIL FOR
EVERYONE

SEVEN ALWAYS-ON MAIL PROFESSIONAL EDITION

On a wide variety of mobile devices, SEVEN provides end users with real-time access to corporate and personal data such as Microsoft Outlook, Lotus Notes, calendar, personal contacts, and global address lists.

Email and other related information is via True Push delivered in real-time over the air without the need for cable or cradle synchronization. All activities such as writing, deleting and sending messages, or marking them as unread, are reflected simultaneously in your account as they happen.

You can get SEVEN-powered mobile email on dozens of mobile phones and PDAs based on Microsoft Windows Mobile Pocket PC, Smartphone, and Symbian platforms, e.g. devices from Nokia, Sony Ericsson, and Motorola to name a few.

Please find a complete list of supported mobile devices on;

Keep in touch – all the time

Keep up with the flow of information in real time – provides True Push functionality wherever you are. SEVEN Always-On Mail extends business information and enterprise messaging to mobile devices without users having to lift a finger. Managers can make more informed decisions faster since they have continuous access to relevant background information. Professional services people can serve their clients without delay when receiving new service orders. Salesmen make more sales because they can respond more quickly to customer requests. Communication becomes easier for everyone.

All technical details, including wireless connectivity and security, are transparent. And with real-time push technology, there's no need for synchronization and no delays in getting the latest information and acting on it. You can take your productivity routines for granted, whether they are based on Microsoft Outlook or Lotus Notes. And you can take care of those tasks, wherever you are, anytime.

Perfect for small businesses

SEVEN Always-On Mail Professional Edition is designed for individuals, small businesses and workgroups without the need of IT expertise. It supports up to 25 users on a single desktop installation and can be run by anyone in the company.

If you need enterprise-wide deployment with a large number of users (from 10 and upwards), SEVEN Always-On Mail Enterprise Edition is the recommended solution.

Enhanced productivity and better decisions

These are some of the benefits that you and your company will experience:

- **Flexible.** Provides access to work and personal key information anywhere, anytime via a wide variety of handheld devices.
- **Easy to use.** Provides desktop-like experience and friendly interface for simple remote access to corporate and personal data.
- **Increased productivity.** Turns wasted time into productive time.
- **Push delivery.** Email, contacts, and calendar data are immediately delivered to the device; no need to keep checking for updates by manual synchronization.
- **Faster decision making.** Constant access to the enterprise information flow – being away from your desk shouldn't mean being away from your business.
- **Real-time synchronization.** No desktop cradle hassles or store-and-forward approach security risks; no need to manage multiple inboxes.
- **Great device choice.** Works with a mobile device of your choice, mobile phones, smart phones and PDAs.
- **Enterprise-class security.** Uses 128-bit AES encryption protocols at each link of the communication chain and provides secure user authentication. No data is replicated to third-party servers.
- **Lowest TCO.** The most cost-effective solution available. A minimum of IT resources required. Easy to provision, manage, personalize and use.
- **Simplified registration and billing.** One-stop registration, download, installation and billing from the world's leading operators and resellers.
- **Broad mobile network support.** Technology-agnostic solution that can support any packet-based standard, such as 2.5G, 3G, international and local area network wireless standards.

Quick, hassle-free installation

You purchase the reliable and affordable SEVEN Always-On Mail Professional Edition yourself. It is easy to set-up on an ordinary desktop PC. Available via the world's leading mobile operators and resellers and on a wide variety of mobile devices, SEVEN Always-On Mail Professional Edition provides you and your colleagues with real-time access to your mission-critical data.

The unique technology powering SEVEN Always-On Mail enables end users to employ the solution in minutes without entering a single configuration into the device. This makes it possible for non-technical users to enjoy the benefits of Always-On Mail immediately. Upgrades can be delivered over the air.
